

Congratulations on your pregnancy!

Everything You Need to
Know About the Stages
of Your Pregnancy

Harmony Test

PRENATAL SCREENING FOR TRISOMY 13, 18 AND 21

harmony is a non-invasive prenatal test that screens for trisomy 13, 18 and 21, as well as sex chromosome anomalies and fetal sex. This test analyzes placental DNA present in the mother's blood during pregnancy.

harmony is performed through a maternal blood test. This test can be done as early as the 10th week of pregnancy and it has a detection rate of over 99% for trisomy 21.

Fetal Sex Test

FIND OUT EARLY FOR THE PERFECT GENDER REVEAL

Boy or girl?

You can now find out with a simple blood test as early as 6 weeks of pregnancy.

This test offers a 99.9% detection rate.

Please note that this test is offered for recreational purposes only and does not provide any medical information about your baby's health.
